This laparoscopic surgery, as one of the most on the go sellers here will definitely be in the middle of the best options to review.

Laparoscopic Surgery - What is it? | ASCRS
Laparoscopic or ‘minimally invasive’ surgery is a specialized technique for performing surgery. In the past, this technique was commonly used for gynecologic surgery and for gall bladder surgery. Over the last 10 years the use of this technique has expanded into intestinal surgery.

Laparoscopy | John Hopkins Medicine
Laparoscopy is a procedure used to check the organs in the belly (abdomen). It can also check a woman’s pelvic organs. Laparoscopy uses a thin lighted tube that has a video camera. The tube is called a laparoscope. It is put into a tiny cut or incision in your belly.

Laparoscopy: MedlinePlus Medical Test
A laparoscopy is a type of surgery that checks for problems in the abdomen or a woman’s reproductive system. Laparoscopic surgery uses a thin tube called a laparoscope. It is inserted into the abdomen through a small incision. An incision is a small cut made through the skin during surgery. The tube has a camera attached to it.

What is Laparoscopic Surgery? | Laparoscopic.MD
Today, laparoscopic surgery is a widely accepted surgical technique that uses small incisions and long pencil-like instruments to perform operations with a camera. As the incisions are much smaller than their open counterparts, recovery is faster and post-operative pain is typically less.

Laparoscopy - Wikipedia
Laparoscopic surgery, also called minimally invasive surgery (MIS), bandaid surgery, or keyhole surgery, is a modern surgical technique. There are a number of advantages to the patient with laparoscopic surgery versus an exploratory laparotomy. These include reduced pain due to smaller incisions, reduced hemorrhaging, and shorter recovery time.

Laparoscopic Surgery: Purpose, Procedure, and Benefits
Laparoscopy is a type of surgery that uses smaller cuts than you might expect. The process takes its name from the laparoscope, a slender tool that has a tiny video camera and light on the end.

Laparoscopic surgery
