Digital technology, tiny medicine and artificial vision. In ophthalmology and some other specialties, countries may sometimes use computer-aided or manual (eg, as a small part of Goldmann test: detailed later). The Humphrey field analyser is by far the most commonly used for automated static perimetry, although

The specialty was a pioneering one, lending itself to technical innovation, but it had a low priority in many undergraduate courses, although postgraduate education at hospitals such as Moorfields was world-renowned. Many diseases, for example, high blood pressure, diabetes and some genetic conditions, involved the eye.
