Consumption (economics) - Wikipedia
Consumption is the act of using resources to satisfy current needs and wants. It is seen in contrast to investing, which is spending for acquisition of future income. Consumption a major concept in economics and is also studied in many other social sciences.. Different schools of economists define consumption differently. According to mainstream economists, only the final ...

EAST: Four Simple Ways to Apply Behavioural Insights | The
Apr 11, 2014 • “The behavioural science literature can be complex, so having a simple framework which policymakers can easily access and apply is invaluable. As the Minister responsible for Government Policy, I’ve seen how some of these insights can be applied in practice to help generate policy that’s smarter, simpler and is highly cost-effective.”
