The Internet comprises a decentralized global system that serves humanity’s collective effort to generate, process, and store data, most of which is handled by the rapidly expanding cloud. A stable, secure, real-time system may allow for interfacing the cloud with the human brain. One promising strategy for enabling such a system, denoted here as a “human brain/cloud ...

**Omega-3 fatty acid - Wikipedia**  
Omega−3 fatty acids, also called Omega-3 oils, ω−3 fatty acids or n−3 fatty acids, are polyunsaturated fatty acids (PUFAs) characterized by the presence of a double bond, three atoms away from the terminal methyl group in their chemical structure. They are widely distributed in nature, being important constituents of animal lipid metabolism, and they play an important ...

**Sex and gender: modifiers of health, disease - The Lancet**  
Clinicians can encounter sex and gender disparities in diagnostic and therapeutic responses. These disparities are noted in epidemiology, pathophysiology, clinical manifestations, disease progression, and response to treatment. This Review discusses the fundamental influences of sex and gender as modifiers of the major causes of death and morbidity.

**Hepatitis C - Wikipedia**
Hepatitis C is an infectious disease caused by the hepatitis C virus (HCV) that primarily affects the liver; it is a type of viral hepatitis. During the initial infection people often have mild or no symptoms. Occasionally a fever, dark urine, abdominal pain, and yellow tinged skin occurs. The virus persists in the liver in about 75% to 85% of those initially infected.
Diagnosis and Management of Autoimmune Hepatitis - AASLD
Prewithdrawal liver biopsy is still strongly advised in children to ensure resolution of inflammation. In a retrospective study of 35 children with AIH, 16 (46%) had lack of inflammation on prewithdrawal liver biopsy after 2 years of biochemical remission and were weaned off of immunosuppression. 384 Fourteen of these 16 patients (87%) had hepatocyte ballooning recognition was conducted. Digitised slides were evaluated by 9 internationally recognized expert liver pathologists on two separate occasions: each pathologist independently marked every ballooned hepatocyte and later provided an overall non-NASH NAFL/NASH assessment.
