Analytical Ultracentrifugation V - H. Cölfen 2003-07-01

The basis for this volume is the 11th Symposium on Analytical Ultracentrifugation held in March 25-26, 1999 at the University of Potsdam, Germany. This book presents a comprehensive collection of 33 contributions from leading scientists in this field including: Technical and methodological innovations.- Innovations in data analysis.- Hydrodynamics/Modelling.- Synthetic polymers, colloids and supramolecular systems.- Biological systems.- Interacting systems and assemblies. In contrast to the increasing significance of analytical ultracentrifugation, related modern books are very rare. Therefore, this volume will be a helpful source of information to anyone who wants to catch up with the most recent developments and results related to this important analytical method.

The Book of V. - Anna Solomon 2020-05-05

A GOOD MORNING AMERICA BOOK CLUB PICK A BELLETRIST BOOK CLUB PICK For fans of *The Hours* and *Fates and Furies*, a bold, kaleidoscopic novel intertwining the lives of three women across three centuries as their stories of sex, power, and desire finally converge in the present day. Lily is a mother and a daughter. And a second wife. And a writer, maybe? Or she was going to be, before she had children. Now, in her rented Brooklyn apartment she's grappling with her sexual and intellectual desires, while also trying to manage her roles as a mother and a wife in 2016. Vivian Barr seems to be the perfect political wife, dedicated to helping her charismatic and ambitious husband find success in Watergate-era Washington D.C. But one night he demands a humiliating favor, and her refusal to obey changes the course of her life—along with the lives of others. Esther is a fiercely independent young woman in ancient Persia, where she and her uncle's tribe live a tenuous existence outside the palace walls. When an innocent mistake results in devastating consequences for her people, she is offered up as a sacrifice to please the King, in the hopes that she will save them all. In Anna Solomon's *The Book of V.*, these three characters' riveting stories overlap and ultimately collide, illuminating how women's lives have and have not changed over thousands of years.

Encyclopedia of Polymer Science and Technology - 2003

This completely new Third Edition of the Mark Encyclopedia of Polymer Science and Technology brings the state-of-the-art to the 21st century, with coverage of nanotechnology, new imaging and analytical techniques, new methods of controlled polymer architecture, biomimetics, and more. Whereas earlier editions published one volume at a time, the third edition is being published in 3 Parts of 4 volumes each. Each of these 4-volume Parts is an A-Z selection of the latest in polymer science and technology as published in the updated online edition of the Mark Encyclopedia of Polymer Science and Technology (available at www.mrw.interscience.wiley.com/epst). Order the 12 volume set (ISBN 0471275077) now for the best value and receive each of the 4 volume Parts as they publish. The complete list of titles to appear in Part 1 of this new third print edition can be viewed at www.mrw.interscience.wiley.com/epst and clicking on "What's New". The V Book - Elizabeth G. Stewart, M.D. 2008-12-10

The Groundbreaking Guide Every Woman Needs With *The V Book*, women will learn everything they need to know about the basics of vulvovaginal—or “V”—health, an essential yet often overlooked area of women's health. Dr. Elizabeth G. Stewart, the nation's foremost expert in vulvovaginal care and sexual-pain disorders, answers the questions about the all too common “V” ailments that women are embarrassed to discuss even with their doctors. Drawing upon the latest medical research and two decades of experience treating thousands of women in her specialized gynecological practice, Dr. Stewart has compiled a wealth of information and advice. This comprehensive and authoritative guide for women of all ages includes:

- How your vulvovaginal concerns change throughout the life cycle, from your teens through menopause and beyond
- How to pick a good gynecologist, and how to ask the right questions
- Dos and don'ts of V hygiene—and why sometimes less is better
- The safest use of tampons, pads, and pantliners
- How to handle common symptoms, such as redness, itching, dryness, and discharge
- Which medical tests you should insist upon from your doctor
- Tips for safe and pleasurable sex, and what to do when sexual intercourse is painful
- The latest research on vulvodynia, the vaginal pain syndrome that won't go away
- Diagnosing and treating yeast infections, allergies, and other ailments
- What to do if your doctor detects cancer or precancer cells

And much, much more...

Selections from Apuleius Metamorphoses V - Stuart R. Thomson 2019-02-07

This is the first intermediate-student edition of a selection from Apuleius' Metamorphoses V. Sections 11-24 are included as Latin text with an accompanying commentary and vocabulary. Focusing on a deliberately concise extract from the original, this edition is designed to be manageable for students reading the text for the first time while also perfectly encapsulating the interest of the longer work and inspiring further study of it. A detailed introduction explains points of literary and stylistic interest, encompassing the beginning of the story, from Metamorphoses IV, section 28. Apuleius is considered one of the great Latin stylists. The tale of Cupid and Psyche, a story set within the larger narrative of his novel, the Metamorphoses, follows the romance of the god of love, Cupid, and his mortal lover, Psyche, brought to disaster by the wiles of Psyche's wicked sisters and the anger of Venus, but eventually reconciled. It is both an adventure story, and an allegory for the relationship between the soul and desire. The selection here contains some of the most hauntingly beautiful Latin prose which has come down to us and gives an unparalleled insight into the relationship between philosophy, religion, and art under the high empire.

Handbook for Liturgical Studies, Volume V - Anscar J. Chupungco 2016-03-24

The final volume in the Handbook for Liturgical Studies series, Volume V: Liturgical Time and Space contains the concluding material for an integral study of the liturgy. It opens with a preliminary notion of time and space, before discussing in detail three types of liturgical celebrations on which time and space have a direct and particular bearing. The first of these is the Liturgy of the Hours. This topic is developed in the light of the early Christian tradition until the fourth century and its subsequent forms in both East and West. The second is the Liturgical Year, traditionally called the anni circulus. The development of the Liturgical Year during the first four centuries is reviewed. This is followed by a detailed study of the Byzantine, Roman, and non-Roman Western tradition. It concludes with the theology and spirituality of the Liturgical Year wherein the mystery of Christ as a saving event is made present in time, so that the faithful may lay hold of it through the Word and the sacraments. The theology of liturgical space is drawn from the mutual interaction between the assembled community, which gives meaning to the place of assembly, and the place itself, which upholds and signifies community. Articles and their contributors in Part I: Liturgy of the Hours are "Liturgy of the Hours in the First Four Centuries," by Ruben Leikam, OSB; "Liturgy of the Hours in the East," by Robert Taft, SJ; "Liturgy of the Hours in the Roman Rite," by Ruben Leikam, OSB; "Liturgy of the Hours in the Non-Roman West," by Ruben Leikam, OSB; and "Theology of the Liturgy of the Hours," by Robert Taft, SJ. Articles and their contributors in Part II: The Liturgical Year are "The Liturgical Year in the East," by Matias Auge, CMF; "The Liturgical Year in the East," by Elena Velkova Velkovska; "The Liturgical Year in the Roman Rite," by Matias Auge, CMF; "The Liturgical Year in the Non-Roman West," by Gabriel Ramis; "The Cult of Mary in East and West," by Ignacio Calabuig, OSM; "The Cult of Saints in East and West," by Philippe Rouillard, OSB; and "Theology of the Liturgical Year," by Matias Auge, CMF. Articles and their contributors in Part III: Liturgical Space are "Dedication of the Church in East and West," by Ignacio Calabuig, OSM; "Liturgical Architecture in East and West," by Crispino Valenziano; and "Theology of Liturgical Space," by Cettina Militello. Anscar J. Chupungco, OSB, is the director of the Paul VI Institute of Liturgy in the Philippines and professor of liturgical inculturation at the Pontifical Liturgical Institute in Rome. Among his publications are Liturgies of the Future: The Process and Methods of Inculturation and Liturgical Inculturation: Sacraments, Religiosity, and Catechesis, published by The Liturgical Press. Management Guidelines for IUCN Category V Protected Areas - Adrian Phillips 2002

Protected Landscapes (IUCN Protected Area Category V) are lived-in working landscapes. In the past, there

has been a tendency to see them as a rather Eurocentric approach to protected areas but increasingly the category is being designated in other parts of the world, including in a number of developing countries. The Guidelines include sections on the background and on the planning of such areas, and chapters on the principles, policies, process and the means for their management. The text includes more than twenty case studies from more than fifteen countries in every region of the world.

Reports of United States Tax Court, V. 141, July 1, 2013, to December 31, 2013 - Government Publications Office 2015-02-15

Volume of the United States Tax Court Reports containing case abstracts and opinions of the court regarding cases between July 1, 2013 December 31, 2013. Cases in each volume are listed in the prefatory table. The United States Tax Court is a federal trial court of record established by Congress under Article I of the U.S. Constitution, section 8 providing (in part) that Congress has the power to "constitute Tribunals inferior to the Supreme Court. "The Tax Court specializes in adjudicating disputes over federal income tax, generally prior to the time at which formal tax assessments are made by the Internal Revenue Service. Though taxpayers may choose to litigate tax matters in a variety of legal settings, outside of bankruptcy, the Tax Court is the only forum in which taxpayers may do so without having first paid the disputed tax in full. Parties who contest the imposition of a tax may also bring an action in any United States District Court, or in the United States Court of Federal Claims; however these venues require that the tax be paid first, and that the party then file a lawsuit to recover the contested amount paid (the "full payment rule")." The First Amendment to the U.S. Constitution guarantees a free press and free speech. In this fascinating book, award-winning author Susan Dudley Gold explores the issues involved when the state of New York attempted to override the free speech rights of criminals in an effort to compensate their victims. The case and its ramifications, described in a clear and entertaining narrative, demonstrate the sanctity of the First Amendment, even when protecting the rights of wrongdoers, and how government interference with free speech affects all citizens.

United States v. Apple - Chris Sagers 2019-09-17

In 2012, when the Justice Department sued Apple and five book publishers for price fixing, many observers sided with the defendants. It was a reminder that, in practice, Americans are ambivalent about competition. Chris Sagers shows why protecting price competition, even when it hurts some of us, is crucial if antitrust law is to preserve markets.

Digital Design and Computer Architecture - Sarah Harris 2021-08-17

The newest addition to the Harris and Harris family of Digital Design and Computer Architecture books, this RISC-V Edition covers the fundamentals of digital logic design and reinforces logic concepts through the design of a RISC-V microprocessor. Combining an engaging and humorous writing style with an updated and hands-on approach to digital design, this book takes the reader from the fundamentals of digital logic to the actual design of a processor. By the end of this book, readers will be able to build their own RISC-V microprocessor and will have a top-to-bottom understanding of how it works. Beginning with digital logic gates and progressing to the design of combinational and sequential circuits, this book uses these fundamental building blocks as the basis for designing a RISC-V processor. SystemVerilog and VHDL are integrated throughout the text in examples illustrating the methods and techniques for CAD-based circuit design. The companion website includes a chapter on I/O systems with practical examples that show

how to use SparkFun's RED-V RedBoard to communicate with peripheral devices such as LCDs, Bluetooth radios, and motors. This book will be a valuable resource for students taking a course that combines digital logic and computer architecture or students taking a two-quarter sequence in digital logic and computer organization/architecture. Covers the fundamentals of digital logic design and reinforces logic concepts through the design of a RISC-V microprocessor Gives students a full understanding of the RISC-V instruction set architecture, enabling them to build a RISC-V processor and program the RISC-V processor in hardware simulation, software simulation, and in hardware Includes both SystemVerilog and VHDL designs of fundamental building blocks as well as of single-cycle, multicycle, and pipelined versions of the RISC-V architecture Features a companion website with a bonus chapter on I/O systems with practical examples that show how to use SparkFun's RED-V RedBoard to communicate with peripheral devices such as LCDs, Bluetooth radios, and motors The companion website also includes appendices covering practical digital design issues and C programming as well as links to CAD tools, lecture slides, laboratory projects, and solutions to exercises See the companion EdX MOOCs ENGR85A and ENGR85B with video lectures and interactive problems

Intelligent Agents V: Agents Theories, Architectures, and Languages - Jörg Müller 2007-04-29

The leading edge of computer science research is notoriously fickle. New trends come and go with alarming and unfailing regularity. In such a rapidly changing field, the fact that research interest in a subject lasts more than a year is worthy of note. The fact that, after five years, interest not only remains, but actually continues to grow is highly unusual. As 1998 marked the fifth birthday of the International Workshop on Agent Theories, Architectures, and Languages (ATAL), it seemed appropriate for the organizers of the original workshop to comment on this remarkable growth, and reflect on how the field has developed and matured. The first ATAL workshop was co-located with the Eleventh European Conference on Artificial Intelligence (ECAI-94), which was held in Amsterdam. The fact that we chose an AI conference to co-locate with is telling: at that time, we expected most researchers with an interest in agents to come from the AI community. The workshop, which was planned over the summer of 1993, attracted 32 submissions, and was attended by 55 people. ATAL was the largest workshop at ECAI-94, and the clear enthusiasm on behalf of the community made the decision to hold another ATAL workshop simple. The ATAL-94 proceedings were formally published in January 1995 under the title Intelligent Agents, and included an extensive review article, a glossary, a list of key agent systems, and — unusually for the proceedings of an academic workshop — a full subject index. The high scientific and production values embodied by the ATAL-94 proceedings appear to have been recognized by the community, and resulted in ATAL proceedings being the most successful sequence of books published in Springer-Verlag's Lecture Notes in Artificial Intelligence series.
