Back pain is felt in the back. Back pain is divided into neck pain (cervical), middle back pain (thoracic), lower back pain (lumbar) or coccydynia (tailbone or sacral pain) based on the segment affected. The lumbar area is the most common area affected. An episode of back pain may be acute, sub-acute, or chronic depending on the duration. The pain may be ...

What is the McKenzie Method for Back Pain and Neck Pain?
Many people know about the McKenzie Method of physical therapy and exercise for back pain or neck pain, but aren’t sure exactly what the goals of the program are and what the exercises entail. A central tenet of the McKenzie Method is that self-healing and self-treatment are important for the patient’s pain relief and rehabilitation. No
as well as you can. Over-the-counter pain relievers should be the first choice, and heat on the back may help with relief. If it doesn't get better in a few weeks, or if the type of back pain warrants it, your healthcare provider may advise other forms of treatment.

Neck pain - Wikipedia
Neck pain, also known as cervicalgia, is a common problem, with two-thirds of the population having neck pain at some point in their lives. Neck pain, although felt in the neck, can be caused by numerous other spinal problems. Neck pain may arise due to muscular tightness in both the neck and upper back, or pinching of the nerves emanating from the cervical vertebrae.
