The World Health Report 2001: Mental Disorders affect one
Sep 28, 2001 · One in four people in the world will be affected by mental or neurological disorders at some point in their lives. Around 450 million people currently suffer from such conditions, placing mental disorders among the leading causes of ill-health and disability worldwide. Treatments are available, but nearly two-thirds of people with a known mental ...

Mental Health - Wikipedia
Mental health, as defined by the Public Health Agency of Canada, is an individual’s capacity to feel, think, and act in ways to achieve a better quality of life while respecting the personal, social, and cultural boundaries. Impairment of any of these is a risk factor for mental disorders, which are components of mental health. Mental disorders are defined as the health conditions that...
